OBJECTIVE

I'm a passionate problem solver and creative thinker who loves using technology to make big things happen. I'm a great team player with leadership potential, and I'm always ready to adapt to new challenges. I have a knack for turning ideas into real-world solutions, and I'm excited to dive into a role focused on software. I'm particularly enthusiastic about machine learning and eager to bring my energy, flexibility, and goal-driven approach to AI engineering, where I can contribute fresh ideas and innovative solutions to make a real impact.

EDUCATION

Bachelor of Engineering , New LJ university Expected 2024
Relevant Coursework: CSE (AI/ML) , CPI = 9.1

HSC, Shraddha vidya mandir 2017 - 2019

SKILLS

Technical Skills Python, Machine learning, Data structure and algorithms, SQL, Html/CSS/Bootstrap
GitHub , OOP , Data Engineering , Java Script

Soft Skills Problem Solving , Communication , Leadership Skills , Project Management Skills ,

PROJECTS

Toxic Comment Classifier : Our project revolves around using Python and JavaScript to develop a system based on the Multinomial Algorithm. We aim to identify and categorize toxic content, including images, comments, and voice recordings, so that organizations can effectively remove them and enforce their policies. Through this project, I've learned how to apply theoretical knowledge from books to contribute to the growth of organizations by delivering the desired outcomes.

QR Code Generator : It is a nifty JavaScript application designed to swiftly generate QR codes for your convenience. This handy tool empowers you to create QR codes effortlessly, whether you're sharing website links, contact information, or any other data.

NLP, Pandas, Numpy, Scikitlearn , hyper parameter tuning.
